

HANDLING AND USE OF THE BUOYS

- The utilization of the buoys will be under the strict general regulation indicated on our website and in the catalogue of the areas. Regarding safety we trust at all time in the good seaworthy capabilities of the navigators, avoiding ruptures and entanglements with the ship's propeller, passing the tail around the principal rode and not around the buoy, as the regulation of utilization describes it. Especially, respecting the colour of the corresponding buoy for the length of the craft and the limits of the wind indicated on the sticker of the buoy. As well as to avoid at all times to moor two crafts on the same buoy.
- In case of coming to a field of buoys and finding it occupied, it is not permitted to anchor on the posidonia and you will have to look for a sand area in order to avoid damage of a plant and to enjoy a safer anchorage.
- The buoys have a periodic inspection and maintenance.
- In case of finding a buoy in poor condition we ask you to call +34 902 422 425.

CONDITIONS OF RESERVATION

Procedure of reservation:

- Bookings can **only** be made through the website www.balearslifeposidonia.eu
- Bookings can be made between 20 and 1 day (until 7 p.m.) before the date requested and for a maximum of two consecutive nights **every six natural days**.
- Only one buoy per boat is allowed and anchoring between buoys is not allowed.
- If your reservation details do not coincide with the boat details, you will lose your reservation.

Arrival and departure time:

- The reserved buoys have to be taken between 1.00 and 6.30 p.m. of the arriving day.
- If you have a reservation and you arrive later than 6.30 p.m. without previous notice or some justification, you will lose your reservation.
- The later the buoys can be left is at 12.00 p.m. of the departure day.

Authorisations:

Bookings to use the buoys are issued by the Environment Ministry via the Booking Centre, only through the website.

Types of buoys:

Each buoy is defined with a colour corresponding to boat lengths. On the buoy, the buoy number, the maximum length allowed and the maximum safe wind (16 knots) are noted. The Environment Ministry will accept no responsibility if these conditions are exceeded.

Information:

Boats approaching to moor at the buoys will be visited by the surveillance boat to check the booking and give them information about characteristics of the anchoring area and the Life Posidonia Project (in various languages). When all the buoys are occupied, the surveillance boat will inform the boats about where it is possible to anchor.

With leaving the buoy, the reservation expires automatically.

Usage date: Between 1 June and 30 September every season.
